EXPERTISE

Biology/ Fish Disease

Dr. Mohammad Noor Amal bin Azmai is a Senior Lecturer at Department of Biology, Faculty of Science, UPM. His areas of expertise are in fish diseases, biology and ecology. He actively involved in research on the epidemiology of *Streptococcus agalactiae* in cultured fish in Malaysia. Currently, he is expanding his research interest in utilization of Javanese medaka (*Oryzias javanicus*) as test organism for bacterial diseases study in fish, diseases of cultured marine fishes, and also on biology and ecology of native freshwater fish of Malaysian.

CURRENT RESEARCH INTEREST:

- Epidemiology of *Streptococcus agalactiae* in cultured fish in Malaysia.
- Javanese medaka (*Oryzias javanicus*) as test organism for bacterial diseases study in fish.
- Epidemiology of Viral Nervous Necrosis in cultured grouper hybrid.
- Biology and ecology of native freshwater fish of Malaysian
